Chapter 11 Introduction to Genetics The
scientific study of heredity is called
genetics. Gregor Mendel used purebred
pea plants in a series of experiments to
under-stand inheritance. Pea flowers
have both male and female parts.
Normally, pollen from the male part of
the pea flower fertilizes the female egg
cells of the same flower. This is called
self-pollination. Seeds that come from
self ...

Chapter 11 Introduction to Genetics

Summary

Chapter 11 Introduction to Genetics The varied patterns of stripes on zebras are due to differences in genetic makeup. No two zebras have identical stripe patterns .

Chapter 11 Introduction to Genetics

Genetics and the Environment.

Characteristics are not solely determined by genes, but they are also determined by the interaction between genes and the environment. Example: PKU is a genetic disorder that can lead to mental retardation. Wealthier countries have the ability to test for high levels of PKU during pregnancy and mothers can be put on a special diet to lower PKU levels. However ...
